Talaria XXX

~~$3,200.00~~ **$2,599.00**

The Talaria sting XXX, now available as the Talaria XXX on sale, features a newly designed 40Ah battery, strategically distributing its weight along the bike's frame for optimal balance. This powerhouse pairs seamlessly with adjustable Talaria factory forks and rear shock, offering a smooth ride on 19-inch front and 17-inch rear wheels designed for off-road adventures.

Weighing just 58 kg (128 lbs), the lightweight chassis and dynamic battery deliver a range of up to 80 kilometers (50 miles) and a peak power output of 6,500 watts. Don't miss out on the Talaria XXX on sale—perfect for switching up your riding style with a simple twist of the throttle.

Description

Talaria XXX

Product Features

5000W 60V high torque motor
Torque of 45 Nm
43 mile range
3 hour recharge time
top speed of 46 mph
Hydraulic Disc Brake
223mm Upgraded Brake Rotors
40AH LG Cells Lithium Battery
12Ah charger
Regenerative braking
FREE SHIPPING

Warranty Information:

For 30 days after the delivery date we can replace any part that is deemed defective from manufacturing.

The power system (motor, controller, display and battery) has a 12 month limited warranty. Chassis, swing arm and other none wear part have a 12 months warranty.

We do have exclusions for normal wear components (such as bearings, seals, chain, brake components, suspension valving), as well as misuse or failure caused by damages due to accident, collisions, or neglect.

Misuse also includes altering any wiring, or installing any non-genuine parts, as well as any use for racing. Any misuse in charging, storing, or discharging will void this limited warranty. Limited warranty are non-transferable and you must have proof of purchase from us before asking for warranty replacement.

Gearbox requires an oil change every 600 miles

The combination powertrain design is perfect for the light weight electric X3 bike. The high efficiency brushless permanent magnet synchronous mid-drive motor is built with top rated magnet material and advanced processing.

DC IPM (Interior Permanent Magnet) Improved Motor. The motor is able to output 45N.M peak torque, as well as to have 284N.m peak torque to the rear wheel.

With an all new frame that is purpose built for maneuverability, light weight and compact. This frame uses 6061 aluminum alloy, and a forging process by 6000 tons of pressure for high tensile strength.

The bike is guaranteed to give you a safe, fun, and fearless riding experience through even the toughest terrains.
The dash features a high-contrast OLED display, this offers riders a clear picture of data display with low power consumption.

The dash uses CAN communication in order to transfer data with the battery pack's BMS and the motor controller. The display menu provides a range of information, which includes top/average speed, range, battery data, riding mode, error codes, regen level and more.

The dash is also adjustableto allow different settings for different wheel size, sprocket size, motor regen levels, and change between KM/H and MPH to enhance the compatibility of the bike.

The X3 has an upgraded throttle design that protects the core parts of the throttle so even if the throttle tube suffers impact damage, the throttle can still be used.
DNM rear suspension featuring a multi-link structure. Progressive magnification for varied styles of riding.

Light weight DNM inverted front fork.
2.5-3.5 hour recharge time
The controller is the brain of the Talaria STING.

It has been upgraded for impact resistance, anti – interference, high-precision EABS voltage and discharge current control, error inspection, high and low temperature protection, anti-runaway, and smart energy regeneration.

This brings the rider a powerful, exciting, and safe riding experience with longevity in mind.
Note: Many of our customers like all black so we included pictures of what that may look like if you choose got remove your decals.
